

# CMA Hire Candelabras

All candles are provided separately.

To insert candles –

1. Take a 5p sized ball of white tac and place at the base of the candle.
2. With another piece of tac, roll a strip and place around the stem of the candle at the **base**.
3. Insert candle into the well and press firmly, whilst turning candle to ensure that it is tightly positioned.
4. Do not light candle until it is firmly in the arm of the candelabra.

Safety instructions –

1. When lit, do not move the candelabra, as this may be a fire/health risk if dropped.
2. Make sure that there are no flammable objects that may come into contact with the candles (e.g do not place near curtains)

CMA thanks you for your cooperation.
